

# Ownership Access and Security

Work Pass is a Mobile Device Management (MDM) tool that secures mobility hardware, utilizing select industry MDM features that make sense to an organization, at a fraction of the cost.

## OWN & CONTROL CORPORATE

From enrollment to ongoing management, Work Pass allows you to control your fleet with comprehensive software that restricts hardware and enforces organizational policy.

## SECURE COMPANY NETWORKS & EMAIL

Access to emails, contacts, and networks are protected and monitored from vulnerability and abuse of the company perk.

## MANAGE APPLICATIONS

Optimize fleet usage by viewing, restricting, and pushing applications through to devices from an easy-to-use console.

## FEATURES

### Policy

Through policy groups, an organization can perform iOS certificate push, iOS certificate-based Auth for WiFi, and iOS app blacklisting for DEP enabled device.

### Work Pass Dashboard

The Work Pass Dashboard provides reporting for a fleet's hardware, activity, enrollment status, and app violations with an additional feature for hot stop adjustments.

### Control Centre

Through the Work Pass Control Centre, apps may be pushed to multiple devices and Self-Service Commands may be applied including: Lock, Wipe, Push Email, Change Policy, Move Policy, Push Apps, Enroll, UnEnroll, and Clear Activation Lock.

### MailGuard Dashboard

Deny access to unauthorized devices, control BYOD email access, and limit the use of third-party intermediaries. The visualized dashboard provides you with:

- ▶ Mailbox Sync Count
- ▶ Allowed Devices
- ▶ Blocked Devices
- ▶ Settings + Testing (Verification)
- ▶ MailGuard Policy Listing
- ▶ Command Log

### Device Restrictions

Work Pass restricts devices and secures the company perk from vulnerabilities through a wide range of restrictions securing each device.

### Performed & Automated Commands

Work Pass enables administrators to perform commands without approval including: enrollment, un-enrollment, change policies, and move devices.

### Blacklisting & Deleting Apps

Blacklisted apps are made unavailable to users for download within the App Store/Google Play Store and if the device is DEP enabled, Work Pass can remove the app from the device through a Multi-Device Command.

### WiFi & VPN Access

Through Work Pass, you're able to connect WiFi and the Virtual Private Network (VPN) by configuring a Policy Group with a WiFi and VPN policy.

### Pre-Configured Device Enrollment

Through Apple's Device Enrollment Program (DEP) prohibit Work Pass removal, guide enrollment, and auto-configure devices from the beginning of employee use.

## BENEFITS

### Guided Enrollment Ensures Corporate Ownership

Through Work Pass, devices are set up quickly, are policy configured, and used by the company for company use.

### Utilize the Least Costly & Safest Network

Leverage WiFi investments to reduce device costs and secure information on a device regardless of the network.

### Protect Company Email from External Unassigned Devices

Keep documents and emails from moving out of corporate assets and ensure that devices assigned to an email are the only devices accessing that email.

### Manage the Company Perk and Control Applications

Some applications use a lot of data and cost companies a lot of money. With Work Pass, you're able to block applications from being downloaded and remove applications that may have been downloaded from that device application list.

### One App. One Console.

Through a single mobile app paired to a cloud-based intuitive console, an entire fleet is easily managed by Work Pass and the other effective tools found in the mobile suite: Data Tracker, Clear Cost, and End-User Support.
