

AOS MOBILE

Protect Your Walking Computers Before They Walk Off with Your Data

The computers we carry in our pockets 24/7 have created more endpoints for cybercriminals to exploit, and they're doing a great job. If ransomware were measured as a country, it would be the world's third largest economy, after the U.S. and China, with a gross of \$6 trillion USD in 2021 alone¹.

86% Businesses with at least 1 user accessing a phishing site²

88% of data breach incidents are caused by human error³

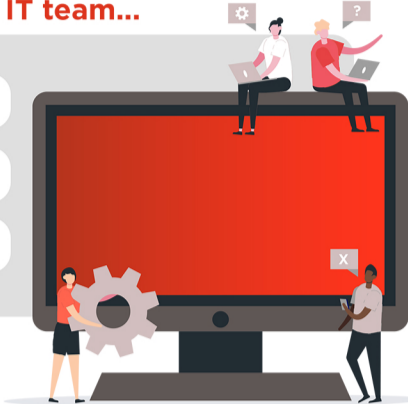

3-4x Rise in cyberattacks as a result of the transition to remote work⁴

Does your in-house IT team...

Not have the time to manage the growing number of devices?

Lack the mobility management expertise to ensure security?

Try to manage your fleet manually, often falling behind?

Simplest things you can do to protect your devices:

Blacklist inappropriate apps

Whitelist acceptable apps

Regularly require passcode changes

Lost/stolen device wipe commands and policies

Mobile Device Management strengthens mobile security

But doing all those things above manually is a waste of time and money. You need an MDM to streamline your mobility management and get back to running your business not managing mobile devices. MDM software enables you to create and manage acceptable behaviors while enforcing policies to assist in the difficulty for malware attacks via your cellphones.

Meraki Systems Manager

Partner

Together AOS Mobile Technologies and Cisco enable you to drive efficiencies, reduce costs, and expand your scalability through the proper management of your mobile device fleet. Cisco's Enterprise Mobility Management solution, Meraki Systems Manager (SM), supports a variety of operating platforms and networks, allowing for the diverse ecosystem often found in today's mobile-centric world.

Automate Network Security

Dynamically adjust access and enforce network security policies based on device compliance

Simplify Endpoint Management

Evaluate risk in real time and direct command line to troubleshoot.

Control Access to Applications

Automatically authenticate identity based on SM installation status

Meraki

Connect. Protect. Control.

With Meraki's MDM platform, you can reduce:

- Security Risks**
- IT Demands**
- BYOD Risks**
- Overall Mobility Spend**

While improving:

- The User Experience**
- Workflows and Flexibility**
- Application Control**
- Regulatory Compliance**

Why AOS Mobile Technologies?

AOS Mobile Technologies is committed to providing services that enable our customers to operate at the lowest possible cost, while meeting all stakeholder needs.

- Knowledge and industry expertise
- One-stop Solution
- Proven Mobility Leader
- Excellent Track Record
- ROI you can count on
